

PROJECT : Terminal 1 Expansion, Birmingham International Airport

CLIENT :
Birmingham Int.
Airport

LOCATION :
Birmingham,
West Midlands

VALUE :
£2.2m

Challenges -

Extension of the existing departure check in area by an extra 13 check in desks and expansion of the baggage handling facility in Terminal 1 at Birmingham International Airport. The work involved security clearance, maintaining security along with working in an operational terminal building.

Solution -

Safety Advisors worked with the Birmingham Airport operators and the principal contractor to establish high levels of security and safety throughout the works with an on-site safety team providing support and monitoring health and safety.

Results -

The work was undertaken without disruption to the terminal. Security maintained.

Skills -

- Site based health and safety surveillance
- Knowledge of safety and health requirements
- Communication between all stakeholders
- IATA and IOSh qualified safety consultants
- Knowledge of internal security

Safe today, health tomorrow
